Northwest Incident Activity

New Fires and Acres

8 fires for 46 acres
OR: 7 fires for 46 acres
WA: 1 fire for 0 acres

Large Fire Summary

New large incidents: 0
Reported incidents: 0 (OR: 0, WA: 0)
0 acres growth on existing incidents

Northwest IMT Activity

NIMOs Committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0

National Fire Activity

Initial attack activity: Light (100 new fires)
New large incidents: 4
Large fires contained: 6
Uncontained large fires: 16

National IMT Activity

Area Command Teams: 0
NIMOs committed: 0
Type 1 IMTs committed: 1
Type 2 IMTs committed: 7

Nationally, there are 6 fires being managed under a strategy other than full suppression.

Northwest Current Incident Details

Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [NW Large Incident Summary](#) or [Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies \(YTD\)](#)

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

Northwest Fire Weather Summary

Rain is expected on Sunday becoming heavy at times for the west side. Thundershowers are likely over the Cascades and sections of both central and eastern Washington and Oregon. Thundershowers have plenty of moisture so heavy rain is possible and lightning that continues during the night. Showers and thundershowers will migrate northeastward on Monday, Monday night, and Tuesday as the upper flow pattern shifts. General winds are expected to increase on much of the east side on Tuesday with the weather pattern shift.

Monitor NWS forecasts for the latest local forecasts and advisories for your area.

Northwest Fire Potential Summary

Significant fire potential remains reduced due to the lower fire danger recorded over the last week. However, fire starts are expected with lightning on Sunday through Tuesday mainly over sections of the Cascades and east side of both Oregon and Washington. Rain with thunderstorms will likely limit the number of ignitions but will still slightly elevate the risk of large fires for the next several days. Increasing general winds on the east side on Monday and Tuesday could add to the slightly elevated risk.
